Hyundai Creta — 2025

CarCare RAG Demonstration Owner Manual

IMPORTANT: This is synthetic demonstration data created for an educational RAG project. It is not an official manufacturer manual and must not be used for real vehicle maintenance, repair, safety, or specification decisions.

Dashboard Warning Lamps

• Charging System Warning: A charging-system warning may indicate a fault in the alternator, charging circuit, or related components. If the warning stays on while driving, reduce unnecessary electrical load and have the vehicle inspected.

• Engine Coolant Temperature Warning: A high-temperature warning indicates that engine coolant temperature may be excessive. Stop safely, switch off the engine if necessary, and allow it to cool.

• Low Tyre Pressure Warning: The warning indicates that tyre pressure may be below the recommended level or that the monitoring system has detected an abnormal condition.

Tyre Pressure

• For this demonstration dataset, normal cold tyre pressure is represented as 33 PSI. Actual pressure must be checked against the tyre-pressure label and official manual for the exact vehicle and tyre configuration.

• Check pressures before long journeys and when tyres are cold.

Engine Oil and Maintenance

• Check engine oil on level ground and keep the level between the indicated limits.

• For demonstration purposes, the routine engine-oil service interval is represented as 10,000 km or 12 months, whichever occurs first. This value is synthetic and must not be treated as an official Hyundai service schedule.

Driving Modes

• Eco mode is designed to favour efficiency during normal driving. It may change accelerator response and transmission behaviour.

• Sport mode is intended to provide more immediate response. Normal mode is the standard driving setting.

Emergency Guidance

• If a critical warning appears together with unusual noise, smoke, loss of power, or overheating, stop safely and seek professional assistance.

• Use the official owner's manual for exact warning symbols, specifications, and service requirements.
